EDUCATION

University of Pennsylvania, School of Engineering & Applied Science **Philadelphia, PA**
Candidate for a Bachelor of Science in Engineering in Digital Media Design **May 2029**
Cumulative GPA: 3.93/4.00
Relevant Coursework: Multivariable Calculus, Linear Algebra, Programming Language and Techniques, Computer Systems, Computer Graphics, Computer Vision, 3-D Computer Modeling

Dougherty Valley High School **San Ramon, CA**
Weighted GPA: 4.52/5.00 Unweighted GPA: 4.00/4.00 **May 2025**

TECHNICAL SKILLS

Java, Python, C#, C, C++, HLSL, Javascript/HTML/CSS, Unity, Unreal, Maya, Git/Perforce, Davinci Resolve

PROFESSIONAL EXPERIENCE

RWTH Aachen Digital Additive Production **Aachen, Germany**
VR and Haptics Research and Development **May 2026 - Aug 2026**

- Developed an immersive VR lattice prototyping platform by integrating Rhino Grasshopper into Unity, enabling realtime parametric CAD design, haptic stiffness simulation, cross-sections, to accelerate additive manufacturing.
- Edited the Meta XR Interaction SDK and Senseglove source code in C# for more intuitive user interaction with the Meta Quest 3 headset and Nova 2 haptic gloves.
- Optimized Grasshopper mesh calculation and import into Unity times from an average of 10 minutes to 2 minutes.
- Coded and animated printing processes for a digital twin of an Aconity industrial LBPF 3D printer for simulation

LEADERSHIP EXPERIENCE

Penn UPGRADE (Game Research & Development) **Philadelphia, PA**
Game Design Lead **August 2025 - Present**

- Managing scope, planning, and game design for novel semester-long club-wide (20+ members) projects
- Program and design race karts and UI in Unity 3D for UpgradeKart, a cartoon-style multiplayer PC and console physics-based racing game with 10 unique kart designs and multiple racetrack levels

Carnegie Mellon University Game Academy **Pittsburgh, PA**
Lead Engineer & Producer **June 2024 - August 2024**

- Led a team of 5 to develop an original VR cooking comedic horror game, *Lulu's*, using Unity 3D, in two weeks
- Implemented finite state machines, artificial intelligence, and path-finding algorithms that reduced lagging which was frequent for VR games
- Utilized Meta's Oculus and SDK package to create novel interactions such as grabbing and pouring

PROJECTS

CGARP (Computer Graphics & Animation Research Projects) **Remote**
Blender 2D Effects in 3D Animation Tool **January 2026 - Present**

- Research and write documentation in preparation for submission to SIGGRAPH
- Learned and utilized Blender's Python API to develop a custom tool for integrating 2D effects within 3D animation that streamlines the compositing pipeline for comic book style animations like *Spider-Man: Into the Spideverse*.

INTERESTS

Oil Painting, Photography, Ultimate Frisbee, Football, Basketball, Hiking, National Parks, Scuba Diving
